

ANGLE HEAD ADAPTOR

Our angle head adaptor was designed to allow for easy transducer rotation to precisely any angle in either the Port or Starboard direction. It is capable of mounting to any mast flange and attaching to any transducer needed. The adaptor comes standard with 0° position and two other angle locations customizable by the user. More positions can be added if required.

STANDARD FEATURES

- Rotatable up to 60°
- 0° location and two other locations.
- 6061-T6 aluminum and 316 S.S. Construction.
